ABOUT ME

Full Stack Developer | Designer | Problem Solver

I build digital experiences with the eye of a designer and the logic of a developer. With a background in complex system management and my Architecture Studies, I bring a unique "spatial" perspective to web development—prioritizing how users experience a digital space through their senses and interactions. Having successfully pivoted into Full Stack development, I combine professional maturity and leadership experience.

I don't just write code; I design scalable, intentional environments that work beautifully from the foundation up.

PROFESSIONAL EXPERIENCE

Medical Manager | Pamtechs - Power Plant Construction Site | 2021-2023

- **Operations Management:** Directed daily operations of medical facility.
- **Compliance & Safety:** Ensured rigorous adherence to medical safety protocols and strict regulatory standards.
- **Cross-Functional Coordination:** Managed multi-interface communications.

EMT & Ambulance Driver - First Responder | A.A. Eilat | 2010-2013

- **Critical Decision-Making:** Executed rapid, high-pressure decisions in life-critical situations, maintaining professional standards under extreme stress.

Sales Manager | Disc Club Eilat | 2004-2008

- **Team Leadership:** Supervised a staff of employees for 4 years, consistently exceeding high-volume sales targets.
- **Logistics:** Managed inventory control, sales reports, and day-to-day operational workflows.
